

About GDP

GDP is a multidisciplinary architectural and design practice founded in 1990. With over 30 years of experience, our focus on cross cultural collaboration and technical expertise, create innovative workable solutions that improve people's lives.

The GDP approach to design is a collective effort; not confined to a singular narrative. Our diverse portfolio reflects a variety of building types and sustainability projects, which addresses context to create its own culture and environment.

In response to the unique characteristics of each project, our research strategy is comprehensive and the basis for which continually inspires and breathes new life into GDP. These forward-looking insights allow us to work seamlessly on legacy projects, in consultancy services, and map out design that is shaping the future of Malaysia.
